# Sustainable Business Certifications

## Public Benefit Corporation

As a Benefit Corporation since 2013, we prioritize the impact of our business on society and the environment. Benefit corporations create a measurable positive impact on all stakeholders, including employees, vendors and the community at large.

## Certified B Corporation

As a certified B Corporation since 2010, World Centric meets rigorous standards of social and environmental performance, accountability, and transparency. Learn more at [bcorporation.net](https://www.bcorporation.net).

## Other Key Memberships

See back page for our sustainable product certifications.

## World Centric's Mission: Giving 25% of Profits

Did you know that in 2022, 685 million people lived on less than \$2.15 per day, struggling to access basic necessities like food, water, sanitation, education, and healthcare? Climate change worsens their situation, leaving these communities with few resources to adapt.

Since 2009, World Centric has donated 25% of our annual profits to grassroots organizations addressing social and environmental injustice in these areas. We believe a better world begins with ensuring access to basic needs and economic opportunities.

Below are our giving numbers to date since the inception of our program in 2009:

**\$17M+**

Total Giving Since 2009

*Includes Impact Giving, Regional Giving, Carbon Giving and Product Donations*

**315+**

Programs & Projects Funded

*Projects Span the Globe, Targeting Areas with the Greatest Need*

With profits from FY 2023, World Centric provided grants to the nonprofits listed below. Through our giving, we aim not only to provide assistance but to help drive systemic change at the root of these issues. See our feature on Shared Action Africa on page 46-47. To learn more, visit [worldcentric.com/giving](https://worldcentric.com/giving).

# Resource Recovery Team Memberships & Advocacy

Resource Recovery Managers Erin Levine (left) and Elly Ventura (right) getting their hands dirty in the field testing products.

World Centric's Resource Recovery Managers are subject matter experts in composting, zero-waste regulations, legislation and advocacy. They provide education and help customers navigate compliant products, in addition to recommending the most suitable end-of-life options for our products.

World Centric's products are designed with the end of life in mind. Ideally, the end is in a compost system which will allow the products to return to the earth. The unfortunate reality is that many of our products do not reach their intended final destination. There are several barriers preventing compostables from being properly discarded which include a lack of composting infrastructure, access to composting collection or drop off and overall lack of awareness of the benefits of compostables by consumers and businesses.

We are striving to change that through our participation in numerous composting advocacy groups that lobby for more widespread access to composting in North America. Our Resource Recovery Team participates in the following organizations and advocacy groups:

Member

Member

California Senate Bill 54 Advisory Board Member  
Representing the Covered Material Category of "Certified Compostables"

The Circularity of Compostables Futures Search  
Steering Committee

Active with SB 54 Implementation Group and Compostable Packaging subcommittee

Active with the Compostable Packaging Collaborative and Packaging Policy Collaborative

U.S. Composting Infrastructure Coalition Member, Membership Committee, Young Professionals Mentorship Program, Legislative and Environmental Affairs Committee and several affiliated State Chapters across the country

Email [zerowaste@worldcentric.com](mailto:zerowaste@worldcentric.com) for more information on foodware legislation and compliant products available.

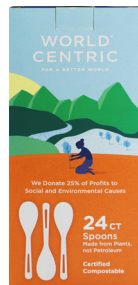

# Compostable White Cutlery

**WORLD  
CENTRIC**  
FOR A BETTER WORLD

World Centric white cutlery is made from TPLA, a bio-based plastic made from plants and minerals. These utensils take less energy to make and produce fewer carbon emissions than petroleum plastic and help reduce plastic waste in the environment. Learn more at [worldcentric.com/retail](http://worldcentric.com/retail).

- Petroleum free
- Made from plant sugars with talc added for heat resistance
- Reusable and dishwasher safe
- NSF® verified industrially compostable where facilities exist
